

## Presentation and Networking Event

# Lessons for Tailings Managers and Engineers from Maritime Industry Failures (2024-25 CIM Distinguished Lecturer Award)

**Caius Priscu**  
Principal Geotechnical Engineer, Priscu and Associates Consulting

**Dr. Caius Priscu** is a senior civil-geotechnical engineer with 35+ years of global experience in dams, embankments, earthworks, tailings and mine waste management, dam safety, risk assessment, and mine closure. He is co-founder and principal engineer at Priscu and Associates, with project work across North and South America, Europe, Africa, Asia, and Australia. His specialties include dam engineering (water and tailings), portfolio risk management, dam safety reviews, due-diligence, mine closure, and water management for mining and hydropower. He holds a PhD from McGill, is a licensed P.Eng in B.C., and is active in CDA, and CIM. He has volunteered widely, including with CDA, MAC, CIM, SME, ICMM, and ICOLD Chile. He is a recipient of the CDA 2023 Peter Halliday Award for Service, and an Honorary Member of ROCOLD and the Technical Sciences Academy of Romania. He currently leads the development of a new ICOLD Bulletin on Tailings and Embankment Dam Surveillance (draft expected in Q4 2027).
